Personal Statement

A technical-savvy web developer with special focus on object-oriented programming. With my desire for self-improvement, I took on the journey of learning different web technologies online and onsite. Being introduced to the Internet at an earlier age, I always thought that I can contribute to the overall well-being of society by using the power of technology. With this in mind, I started learning web development and have never looked back again. Already at a place where I can build dynamic web applications myself, I hope to incorporate new ideas with my existing knowledge to create more real-world problem solving solutions for the masses.

Skills

Focus and interest in object-oriented programming principles.

Good knowledge of QuickBooks

Intermediate Peachtree Accounting

Intermediate to Advanced MS Access 2010

Bilingual-English and Urdu/Hindi

Projects

1. Get Tek (Python/Django/SQLite)

A price comparison application which fetches all the data of a particular product from a database, and returns all retailers selling that product in ascending order, with lowest prices at the top and most expensive at the bottom. It was a first time project experience and really gave me an overall perspective of how to design the database, and how to code the backend and display the relevant material in the front-end.

2. Tech Bazaar(C# .NET Core/SQL)

An E-commerce web application designed to imitate the process companies go through in developing e-commerce applications. The project currently has basic functionality like shopping cart, product description page, dashboard page that displays all products in the database, a functioning payment system integrated using the Stripe API. The app currently has mailer functionality where users receive an email as soon as they complete the order successfully. One of the features currently in development is the email feature where the user gets the complete order history and is able to download the invoice into their computer.

Other features expected to work in the future on are discount coupon codes, tax and shipping rates, and making it a marketplace app, where each user can both buy and sell products.

3. Payroll Application(C# .NET Core/SQL/Angular)

Currently working on it.

4. Portfolio Website(C# .NET Core/Angular)

Currently working on it.

Education

1. Coding Dojo Web Development Immersive(2018)

- Red Belt in Python
- Red Belt in C#
- Red Belt in MongoDB, Express.js, Angular, Node.js

2. Free Code Camp(2017-Present)

3. University of Illinois at Chicago(2013)

Bsc in Accounting G.P.A 3.89

Programming Languages: Python, C#, JavaScript, Java(Basic), TypeScript,

Technologies : AJAX, Bcrypt, Amazon EC2, Microsoft Azure, Sockets, APIs, MVC, PostMan, REST API Generation, Unit Testing, OpenCV, Gunicorn, WSGI, Responsive Web Design

Frameworks : Angular, Node, Express, Flask, Django, ASP.NET Core, Entity Framework, Dapper,

Databases : SQL, SQLite, MongoDB, Mongoose

Learning Goals for 2019 : React, Java, MicroServices Architecture

Experience

1. Coding Dojo - Student Web Developer(Sept 2018 - Present)

- 14-week immersive web development course learning 3 different full stacks and numerous tools and technologies.
- Experience and exposure to JavaScript, MEAN, C#,.NET Core, and Python - Django and Flask.

2. **Uber** – Uber Partner(2013 - Present)
 - Managing routes to taking time and cost complexity into account(Ex. traffic).
 - Ensuring timely and safe transportation of customers.
 - Maintaining vehicle in clean and safe operating condition.
 - Dealing with unforeseen circumstances on the road peacefully and intelligently.
 - Building a strongly knit community with positive social interactions.
3. **U.S. Census Bureau** – Enumerator(April 2010-June 2010)
 - Ask questions in accordance with instructions to obtain various specified information, such as person's name, address, age, religious preference, or state of residency.
 - Meet with supervisor daily to submit completed assignments and discuss progress.
 - Review data obtained from interview for completeness and accuracy.
4. **Jackson Hewitt Tax Service** - Office Manager(2007-2010)
 - Prepare or assist in preparing simple to complex tax returns for individuals or small businesses.
 - Interview clients to obtain additional information on taxable income and deductible expenses and allowances.
 - Consult tax law handbooks or bulletins to determine procedures for preparation of atypical returns.
 - Check data input or verify totals on forms prepared by others to detect errors in arithmetic, data entry, or procedures.
 - Resolve customer complaints regarding sales and service.
